

March 23, 1976

amount of problems for the Enrollment people and Engrossing people, if we place some of these bills off of General File on Select File and then proceed from there. This almost makes an impossible task for him in these short days. So, we will almost have to forego that in its entirety of placing them on Select File in order to just process numbers. Then we will have a bog down later on when we get past Select File or beyond. With that I would like to urge you to exert self restraint, either vote a bill up or down. Whatever your desire is instead of long protracted, repetitious debate. I have been asked by many people here that we limit the time of debate. I would rather that this body would limit themselves, then I as your Speaker limit debate of five minutes or ten minutes on an issue. I think that we can all individually take that upon ourselves instead of having an edict from the Speakers office. So, we will now start, I guess that the first item on the agenda is LB752, Frank Lewis', if you are ready Senator Lewis we will proceed with that. Then we will go down the consideration of bills on General File.

PRESIDENT: Senator Kelly, for what purpose do you rise?

SENATOR KELLY: Mr. President, a question of the Speaker. Senator Burbach, when you mention the campaign election laws, you mentioned 987. Are you going to have 182 or have you side tracked it?

SENATOR BURBACH: No, Senator Kelly as I understand it, LB182 was supposed to come after LB987 and if 987 passes, I thought that you told me that 182 wasn't necessary. Is this correct, or did I misread you?

SENATOR KELLY: That is what we want to find out as we go across, that they should be taken together. If you remember I set 182 back, it is almost a month now, so that we wouldn't double up arguments on these bills. I sure wouldn't want it to be left off of the agenda.

SENATOR BURBACH: If 987 fails to pass, then you will want consideration of 182 and I find no fault with that. But, I was assuming that 987 would pass and then we didn't have any need for your bill, is that correct?

SENATOR KELLY: Yes, that would be correct. I would be satisfied with 987, if it passes, but 182 ought to follow it on across the board. Otherwise it would be stuck in general file and dead because of a technicality.

SENATOR BURBACH: Fine, I will put it on the agenda for tomorrow, one after the other one. With the understanding that 182...there...

SENATOR KELLY: We won't have duplication of debates, because this particular 182 contains....is contained in 987.

SENATOR BURBACH: I will provide for that on the agenda following the other one, and I will put it in parenthesis.

PRESIDENT: Senator Kelly, does that complete your questions?

SENATOR KELLY: Yes, thank you Mr. President.
